SKILLS

Full-stack development: Angular, NodeJs, TypeScript, RxJs, NgRx

Cloud Infrastructure: AWS

APIs: REST, GraphQL

Architecture: Microservices, Micro-frontends, Serverless, Mono-repositories

DevOps: CI/CI Pipelines, IaaC (terraform), Docker

Testing: E2E tests (Cypress), Jest

Soft: Scrum Master (briefly), Mentoring, Leadership, Product refinement

LANGUAGES

English

Romanian

PROFILE

Results-driven full-stack engineer with a passion for building and optimizing complex web applications. Proficient in Angular, RxJs, Node.js, TypeScript, and AWS cloud technologies, with a proven track record of delivering high-quality code across the development spectrum. Adept at leading technical initiatives, mentoring colleagues, and fostering a collaborative team environment. Demonstrated success in architectural decision-making, performance optimization, and implementing best practices to ensure project success.

EMPLOYMENT HISTORY

Senior Angular Developer at Faptic Technology, Remote
Dec 2024 — Present

XM - large scale forex/CFD trading platform

- Angular/Ionic app serving over 1 million customers
- Maintaining and enhancing the KYC (Know Your Customer) system by developing dynamic forms using Formly, building reusable custom components for various field types that were integrated across multiple business streams.
- Implementing a generic step-up authentication feature that automatically triggers through an HTTP interceptor based on specific error responses, improving security workflows.
- Developing engaging landing pages with an Instagram Stories-like interface to enhance user experience and engagement.

Senior Frontend Engineer at Selfpay
Jan 2024 — Nov 2024

Watchmen - operations back-office solution

- Reconstruction of an already existing back-office web platform, used by many employees and representing the backbone of operations in the company.
- Built features using a RxJs-heavy architecture (including state management), with significant involvement in the product definition.
- Undertook responsibilities on the Angular Ionic app, performing several major upgrades for Ionic, Capacitor, etc. Integrated SSO login on the platform as well as few other features.

Stack: Angular, RxJs, Nx, Material, Playwright, Storybook, Ionic, Capacitor, Azure Pipelines.

(Junior - Senior) IT Consultant at .msg systems, Cluj-Napoca
2019 — 2023

Dipko - digital municipality services startup platform

- SaaS platform, streamlining ticket sales and self service operations for municipalities in Germany.
- Microservice-centric architecture, built on top of AWS with some usage of serverless technologies and Angular UI.
- Establishing a design system using Storybook, consolidating core aspects of our app through improvements to building and bundling process.
- Wrote and maintained E2E tests using Cypress.
- Built and maintained a public API module, offering support to its consumers.
- Mentored colleagues, undertook onboarding processes.

Stack: Angular, RxJs, NgRx, Node.js, redis, terraform, AWS (EC2, S3, RDS, SES, Api Gateway, AppSync, Lambda, CodeBuild), Cypress, karma, jasmine, jest, Storybook, Chromatic.

Passbrains - Crowd testing management platform

- Serverless platform built with AWS Amplify and Angular, I made important contributions to code sharing and reusability across our functions, proposed an architecture based on libraries.
- Optimised build time of the apps, by implementing esbuild and transitioning the output from CJS to ESM.
- Integration of another third-party developed application within our own, using Webpack's Module Federation, where I led the implementation of the microfrontend solution.

Stack: Angular, RxJs, NgRx, Material, AWS CDK, AWS (Amplify, AppSync, Lambda, SES, SQS, Aurora, Elastic Beanstalk, DynamoDB), Nx.

Web Developer at Salomonia SRL, Mediaş
2015 — 2016

Shop management solution using PHP (Symfony), alongside jQuery for UI implementations.

EDUCATION

Bachelor of Science, University of Babes Bolyai, Cluj-Napoca
Oct 2017 — Jul 2020

- External Relations Department Manager ofHermes NGO, fundraising for the NGO's events (hackathons, job faires, etc.)
- Graduated, however did not defend the thesis.
